PRODUCT DATA SHEET

TrueTouch® Bio-Spray Hydrating Activator

Moisturises and tones the skin

DESCRIPTION

TrueTouch® Bio-Spray Hydrating Activator is a refreshing facial mist that moisturises, and tones the skin. Featuring Haberlea rhodopensis, a plant with unique rejuvenating properties, this hydrating spray creates a pathway to the skin, transporting moisture and nutrients while supporting skin's Natural Moisturising Factor. Bio-Mist Hydrating Activator works in conjunction with other TrueTouch® skin care products and is engineered to promote the delivery of action ingredients that enrich your skin.

BENEFITS

- ▶ Carries moisture and nutrients to the skin, keeping skin hydrated
- ▶ Moisturises and protects skin's vitality by supporting its Natural Moisturising Factor (NMF)
- ▶ Enhances skin's suppleness, improving the appearance and texture of the skin with both moisturising and mild toning properties
- ▶ Works in conjunction with other TrueTouch® skin care products and is engineered to promote the delivery of action ingredients that enrich your skin with the right messages
- ▶ Features an EU-allergen friendly fragrance blend
- ▶ Dermatologist tested.

DIRECTIONS

Mist a moderate amount on clean face, hands, and other desired areas. Gently rub into skin. Additional mist can be applied after treatment products.

FULL INGREDIENT LIST

ALLERGY ADVICE

PRODUCT FORMAT

130ml

Includes separate spray pump to be fitted after opening product.

ITEM CODE

2366GB

KEY INGREDIENTS

- ▶ **Haberlea Rhodopensis** — Known as the “resurrection plant” for its ability to revive itself after months of drought, this natural skin conditioning agent possesses super-hydrating properties that surround the skin with a protective moisture layer to moisturise skin and increase the appearance of surface cell vitality.
- ▶ **Natural Moisturising Factor (NMF) Support Complex** — This complex provides components of the skin’s NMF to help protect and support the skin’s natural ability to retain moisture; it includes urea, saccharide hydrolysate, magnesium aspartate, glycine, alanine, and creatine.
- ▶ **Hydrolyzed Glycosaminoglycans** — This lower molecular weight compound increases the depth of hydration to skin’s surface layer to lock in moisture.
- ▶ **Sodium PCA** — Derived from fruits, grasses, and vegetables, Sodium PCA is an important part of the skin’s Natural Moisturising Factor (NMF) and supports balanced moisture levels.
