

Advanced ProBiotic

Natures perfect food

DESCRIPTION

A performance formula that promotes optimum digestive health and helps immune function by supporting the growth of friendly bacteria. With 2.88 billion viable* cells per capsule, this is one of the most powerful probiotics available and an effective way to readily aid digestive health and enhance the absorption of food and nutrients.

Why take probiotics?

Probiotic bacteria are traditionally found in yoghurts and fermented milk drinks. Probiotics work by crowding out harmful bacteria, hindering their growth and restoring the balance of bacteria in your gut. Our digestive system plays a vital role in keeping us healthy and increasing our resistance to infection.

Neways' Advanced ProBiotic features a unique blend of five dairy-free probiotic sources in a stable capsule format that does not require refrigeration and is easy to take with you wherever you go.

*A total amount of live cells.

FEATURES AND BENEFITS

- Five strains of probiotic bacteria – a powerful combination thought to have a beneficial effect on digestive and overall health.
- Inclusion of *saccharomyces boulardii*, a probiotic yeast that helps keep the digestive tract clear.
- Contains L-Glutamine which helps protect the gastrointestinal tract and support the cells lining the intestines.
- Encourages inhibition of pathogenic bacteria in the gastrointestinal tract.
- Promotes the removal of toxins in the gastrointestinal tract
- Stable capsule format, easy to take whole or split and add to foods/beverages.

DIRECTIONS

One or two capsules, twice daily with food. Children under 12 years: half dose.
